

Notice

Microsoft released an update in July 2016 to block Office files downloaded from the internet from loading automatically. The feature is called **Protected View**.

- [1] Right-click on the downloaded xlsx-File TLine_Loss_Calc_R..., and click **Properties**.
- [2] Mark the **Unblock** checkbox near the bottom of the form and click OK.
- [3] Then load the macro-enabled xlsx-workbook TLine_Loss_Calc_R... into Excel.
